

GIORGİ GOCHITIDZE

FULL-STACK DEVELOPER

PROFILE

Full-Stack Developer with 2.5 years of experience building web applications using the MERN stack with TypeScript. Worked on Web Canvas, where I developed a lightweight CRM and integrated AI automation tools. Skilled in React, NodeJS, n8n and cloud deployment. Strong problem solver, eager to deliver scalable, impactful software solutions.

SKILLS

Front-End: HTML, CSS, JAVASCRIPT, React, TypeScript, Redux Toolkit.

Back-End: NodeJs, ExpressJS, MongoDB, Python(basics).

Tools & Deployment: Git, Github, Netlify, Render, Cloudinary, JWT, Framer Motion.

AI Automation: n8n, Gemini API (Google AI).

EXPERIENCE

Web Canvas

Founder and Full-Stack Developer

2024 - Present

- Designed and launched a lightweight CRM (MERN + TypeScript) to manage clients and automate tasks for small businesses.
- Developed AI-powered automation tools (email agent, chatbot) using advanced integration of AI with SaaS products.
- Implemented automation using n8n and worked across full stack and deployment.

Kan-Guroo

Back-End Developer

Sep 2025 - Present

- Worked in an Agile environment with a team to develop and optimize back-end features.
- Gained experience with NestJS framework for efficient server-side development.
- Implemented core features including rating systems, simple statistics for ratings/reviews, and multi-lingual support creation and optimization.

PROJECTS

Web Canvas - Lightweight CRM (MERN + TypeScript, redux, n8n)

- Built SaaS CRM with client management and analytics.
- Optimized performance and integrated SEO for visibility.

TravelPulse - Travel Stories Platform (MERN)

- Developed a community site for sharing travel experiences.
- Implemented story upload search and review features with responsive UI.

Please Note that this projects is running on free instances so, in case of inactivity servers is shutting down after 15 minutes and after visiting website or activity it will take 1 minute to start up, after this there will be any delays unless its shut down again.
