Georgian – Native

English – B1–B2

EDUCATION

SkillWill College Front-End (React)

Development

Nov 2025 – Present

N14 Public School General Education,
2013–2025

Self-taught through personal projects &
documentation

PROFILE

Self-driven Full-Stack Developer with **3 years of hands-on experience** building web applications using the MERN stack and TypeScript. Independently designed and shipped a mini CRM web app (**Web Canvas**) to master real-world product architecture, business logic, and AI-powered automation. Currently contributing to back-end development at **Kan-Guroo** in an Agile team using NestJS. Strong focus on clean code, practical problem-solving, and leveraging AI tools to build smarter. Additionally, I'm actively learning CyberSecurity and Ethical hacking, with hands-on practice in penetration testing and vulnerability assessment.

EXPERIENCE

Back-End Developer

Sep 2025 – Present

Kan-Guroo

- Worked in an **Agile/Scrum** team - sprint planning, daily standups, feature delivery.
- Built and maintained server-side features using **NestJS** for scalable architecture.
- Implemented rating & review systems with statistics aggregation.
- Developed **multi-lingual (i18n) support** - schema design and query optimization.

PROJECTS

Wallstreet - Food Shop Website

NextJS · TypeScript · Redux · TailwindCSS · Cloudinary · NodeJS + Typescript · MongoDB

Real ordered project. Independently built Full-Stack Food shop website with small admin panel for managing orders from restaurants and hotels.

[wstreet.netlify.app](#) | [Github](#)(Private)

Linkly - URL Shortener Website

NextJS · MongoDB · Typescript · TailwindCSS · Vercel

Built URL shortener website where you can convert long boring urls to small link to use and comfortable to see, check how many clicks got and see status if it's still active.
