

GIORGIO GOCHITIDZE

Full-Stack Developer · MERN · TypeScript

Batumi, Georgia | giorgigochitidze555@gmail.com | +995-593-34-84-57 | [LinkedIn](#) | [GitHub](#) | [CV Website](#)

SUMMARY

Full-stack developer with 3 years of experience building web applications with the MERN stack and TypeScript. Independently designed and shipped a mini CRM (Web Canvas) to master real-world product architecture, business logic, and AI-powered automation. Strong focus on clean code, practical problem-solving, and leveraging AI tools to build smarter.

EXPERIENCE

Back-End Developer — Kan-Guroo *Sep 2025 – Mar 2026*

- Worked in an Agile/Scrum team - sprint planning, daily standups, feature delivery
- Built and maintained server-side features using NestJS for scalable architecture
- Implemented rating & review systems with statistics aggregation
- Developed multi-lingual (i18n) support - schema design and query optimization

PROJECTS

Sentinel - Real-Time Performance Monitor Imitation

Next.js · TypeScript · Tailwind CSS · NestJS · PostgreSQL (Neon) · Redis Queues (Upstash) · WebSockets

Real-time performance logging application imitating status, warning, info, and critical messages. Optimized with Redis-backed queues to prevent server overload, with a clean SQL-based architecture and live data delivered via WebSockets.

[Live Demo](#) | [Front-End Repo](#) | [Back-End Repo](#)

Wallstreet - Food Shop Website

Next.js · TypeScript · Redux · Tailwind CSS · Cloudinary · Node.js · MongoDB

Real ordered project. Independently built a full-stack food shop website with a small admin panel for managing orders from restaurants and hotels.

[Live Demo](#) | [GitHub \(Private\)](#)

Linkly - URL Shortener Website

Next.js · MongoDB · TypeScript · Tailwind CSS · Vercel

Built a URL shortener that converts long URLs into short, shareable links, with click tracking and active/inactive status.
